

just because

just because I can I write another song
just because I can I make it go along
the lines of you and me and the way that it'll be
that you'll be my man just because you can

just because I can I sing this song to you
just because you can you gonna play it too
and I look forward to tonight
'course at the end we just might
play this song real loud because we can

we spend days and days together in our fuzzy haze
course we spend days and days in love

just because I can I believe in us
and just because I can I choose to make a fuss
about the fact that I love you
and that I know that you do too love me all the way just because you can

we spend days and days together in our fuzzy haze

just because we can I think it's time we could
tell the world about our love and how it should
be like days spent in a haze and have that haze to spend for days
and love it all just because you can

we spend days and days together in our fuzzy haze
